

IVAN EZEKIEL G. REGODON

Quezon City, Metro Manila | regodonivan Ezekiel@gmail.com | (+63) 906 414 1604

Professional Summary

BSIT student specializing in Mobile and Web Applications with practical experience building full-stack web solutions and managing technical event infrastructure. Proficient in the MERN stack, JavaScript, React, and REST APIs, with a focus on creating practical software systems for client and business operations. Aiming to leverage frontend and backend development skills as a Software Developer Intern.

TECHNICAL SKILLS

- Languages & Frameworks: JavaScript, React, Node.js, Express.js, Java, HTML5/CSS3, Dart, SQL
- Developer Tools & Databases: MongoDB, Git, GitHub, REST APIs, Flutter
- UI/UX & Prototyping: Figma, Canva, Wireframing, Responsive Design
- Systems & Support: Technical Infrastructure Setup, System Configuration, Hardware Troubleshooting

KEY PROJECT

Rice Trader – Full-Stack SME Inventory & Sales Management Platform (Solo Project)

- Independently engineered a full-stack business management system using React, Node.js, Express, and MongoDB to streamline daily SME trading operations.
- Implemented secure REST APIs and database models to track real-time stock levels, purchase orders, sales transactions, and supplier profiles.
- Designed an interactive administrative dashboard with analytics stat cards, custom modal workflows, JWT authentication, and automated audit logs.

SkillMatch – AI-Powered Job & Skills Portal

- Built a city-level job and skills matching portal using the MERN stack to connect local applicants with employment opportunities.
- Integrated prescriptive analytics logic to identify candidate skill gaps and suggest targeted training modules.
- Designed responsive UI components in React and created backend REST APIs to process user profiles, job postings, and skill metrics.

CookItHow – Interactive Recipe & Cooking Web Application

- Developed a responsive web application delivering step-by-step recipe guides and interactive media assets for users.
- Built clean DOM structures and modular CSS styling to maintain fast load times and cross-device compatibility.
- Utilized Git and GitHub for version control and configured local development servers for feature testing.

TECHNICAL EXPERIENCE & LEADERSHIP

Technical Committee Member

Google Developer Groups on Campus – NU Manila | Aug 2025 – Present

- Managed technical infrastructure and hardware setup for workshops including Build With AI and Zero to One with Firebase Studio, catering to 40+ attendees.
- Configured development environments, presentation tools, and network hardware to maintain continuous event uptime.
- Assisted participants with real-time software setup and system troubleshooting during live technical sessions.

Technical Committee Member

AWS Learning Club – Legarda & Wizard Circle | Feb 2025 – Present

- Executed end-to-end setup and hardware troubleshooting for laptops, projection systems, and audio-visual equipment across university tech events.
- Collaborated with event leads to coordinate technical logistics, preventing equipment bottlenecks and setup delays.

Technical & Design Coordinator

TechFiesta 2.0 – National University | March 2025

- Designed digital promotional assets and branding graphics using Figma and Canva.
- Planned booth layouts and technical equipment placement to optimize spatial flow and power accessibility.

EDUCATION

Bachelor of Science in Information Technology
Specialization in Mobile and Web Applications

National University - Sampaloc, Manila

2023-2027

Senior High School – STEM Strand

- Arellano University - Sampaloc, Manila

2021-2023
